Experienced Carpenters - Nationwide Travel

Traveling construction projects across the United States

About TryJax

TryJax Construction is a national general contractor based in Florida, offering opportunities for experienced carpenters and established subcontractor crews on both local and nationwide projects.

We are seeking experienced carpenters for nationwide traveling projects. Versatility across multiple trades and flexibility to support projects in different locations are highly valued and can open the door to a broader range of opportunities with our team.

Qualifications

- Minimum 5 years of hands-on carpentry experience, with the ability to complete quality work independently. No apprentice or entry-level openings.
- Experience in framing, exterior carpentry, interior finish carpentry, and interior and exterior remodeling.
- Individual carpenters and established subcontractor crews are welcome. Nationwide travel is required.
- **Must be able and willing to fly for nationwide project assignments.**
- Must be willing to take road trips across multiple states as needed.

Carpentry & Remodeling Skills

Core carpentry: Framing, exterior carpentry, and interior finish carpentry.
Interior and exterior remodeling:

- Selective demolition and preparation for renovation.
- Door and window installation and replacement.
- Exterior siding, fascia, soffit, and trim repairs.
- Drywall installation, finishing, and repairs.
- Kitchen and bathroom remodeling.
- Cabinet and vanity installation.
- Tile installation, including backsplashes, shower surrounds, and floors.
- Flooring installation and repairs.
- Interior trim, baseboards, crown molding, and door casing.
- Interior and exterior painting and surface preparation.

Trade coordination: Plumbing and electrical work are handled by the appropriate trades.

Tools & Equipment

- Provide your own basic hand tools and power tools. TryJax provides larger equipment as needed for the project.

Work Standards & Applications

Job-Site Expectations

- **Planning and problem solving:** Read drawings, layouts, and written scope instructions; take accurate measurements; and plan assigned work. Identify field issues, develop practical solutions, and communicate anything affecting scope, cost, or schedule to the project manager or superintendent before proceeding.
- **Quality and accountability:** Deliver clean, accurate workmanship through final completion. Check your own work, take responsibility for mistakes, and complete corrections.
- **Reliability and communication:** Show up consistently, follow project schedules, and communicate clearly with the project manager and superintendent.
- **Safety and organization:** Use tools and equipment safely. Keep tools and materials organized, clean up throughout the day, and leave the job site orderly at the end of each shift.
- **Property and materials:** Protect existing finishes, furnishings, and completed work. Identify material needs ahead of time and minimize waste.
- **Professional conduct:** Work respectfully with clients, other trades, and team members, especially in occupied homes and businesses.

Travel Schedule & Support

Standard rotation: Two weeks on the road, followed by one weekend home, then repeat. Fly to the project on Monday of the first week and fly home on Friday of the second week.

Optional extended stays: Staying on the road longer is permitted when project needs allow. Employees are not required to return home every two weeks if they prefer to stay out longer.

TryJax covers all lodging and project-related transportation, including rental vehicles, fuel, airfare, and baggage, and provides a daily per diem. Required road-trip expenses and time spent traveling on those road trips are paid by TryJax.

Compensation

$40-$65/hour for experienced carpenters, based on skill and experience. Subcontractor crew arrangements and pricing discussed individually.

How to Apply: Required Materials

- **Resume:** Relevant carpentry experience and work history.
- **Project portfolio:** Photos, project locations, descriptions of completed work, and the specific work you or your crew personally performed.
- **References:** Contacts who can verify your experience, workmanship, and reliability.
- **Desired pay:** Requested hourly rate; subcontractor crews should indicate their pricing approach.
- **Home location:** Where you are based for travel planning.
- **Travel availability:** Confirm your ability to fly and willingness to take multi-state road trips. Identify any restrictions on travel or time away from home.
- **Availability:** Earliest start date and current availability.
- **Applicant type:** Individual carpenter or established subcontractor crew. Crews should also include crew size, trade capabilities, service area, and insurance information.
