Superintendent / Project Manager - Florida Gulf Coast

Tampa • Bradenton • Parrish • Sarasota

About TryJax

TryJax Construction is a national general contractor based in Florida, offering opportunities to support local and nationwide construction projects.

We are seeking construction professionals for projects in Tampa, Bradenton, Parrish, and Sarasota who can lead on site as a superintendent, manage projects off site as a project manager, or support both functions. Candidates with strengths in either role are welcome. This is primarily a local Florida opportunity; willingness to travel nationwide is a plus, but is not required. The versatility to work across both functions and support projects in different locations is highly valued and can open the door to a broader range of opportunities with our team.

Qualifications

- Demonstrated experience as a construction superintendent, project manager, or both, with a track record of taking ownership of assigned responsibilities.
- Strong understanding of construction methods, sequencing, quality standards, and coordination between trades.
- Ability to read architectural and trade drawings, specifications, and written scopes of work and identify conflicts before installation.
- Sound judgment, practical problem-solving skills, and clear communication with crews, subcontractors, clients, and company leadership.
- Comfort using Buildertrend or similar construction management software, email, digital plans, and shared files.

Superintendent: On-Site Responsibilities

- **Field leadership:** Run the job site, direct crews and subcontractors, and establish clear daily priorities and expectations.
- **Planning and sequencing:** Organize work in the correct order and identify upcoming labor, material, equipment, and delivery needs.
- **Trade coordination:** Understand framing, finishes, and remodeling and coordinate how electrical, plumbing, HVAC, and fire protection fit into the work.
- **Schedule ownership:** Track field progress, identify delays early, and adjust site activities to keep work moving.
- **Quality control:** Inspect work throughout construction, catch deficiencies early, and drive corrections and punch-list completion.
- **Safety and site organization:** Maintain safe conditions, clean and organized work areas, protection of existing property, and separation from the public in occupied spaces.
- **Documentation and closeout:** Maintain daily logs, progress photos, manpower counts, and delivery updates. Coordinate required inspections, resolve deficiencies, and complete field closeout.

Project Management & Applications

Project Manager: Off-Site Responsibilities

- **Project planning:** Build and maintain project schedules, milestones, procurement plans, and coordination of subcontractors and deliveries.
- **Budget and scope:** Track project costs and commitments against the budget, clarify scope, and identify potential overruns early.
- **Procurement and coordination:** Coordinate materials, equipment, subcontractors, and long-lead items so field teams have what they need.
- **Changes and documentation:** Document scope changes, coordinate pricing and authorization, and maintain current plans, decisions, and project records.
- **Client and team communication:** Provide clear progress updates, resolve outstanding questions, and keep clients, field leadership, and company leadership aligned.
- **Closeout:** Coordinate outstanding work, punch lists, required documentation, and project handoff.

Ownership & Versatility

Reporting: Report to Brady, Vice President of Construction, with regular updates on project progress, schedules, budgets, field issues, and decisions requiring leadership input.

- Take initiative, solve routine problems independently, and bring practical solutions when management or design input is needed.
- Recognize extra work and communicate issues affecting scope, cost, or schedule before committing labor or materials.
- Work respectfully with clients, crews, subcontractors, and other trades, especially in occupied homes and businesses.
- Be clear about your strengths: superintendent, project manager, or both. Assignments will reflect experience, project needs, and a manageable workload.
- State your availability for local Florida work, statewide travel, and/or nationwide travel. Flexibility to support all three is highly valued.

How to Apply: Required Materials

- **Resume:** Relevant construction leadership experience and work history.
- **Project portfolio:** Photos, project types, locations, sizes, and scopes. Identify your exact role and your crew and subcontractor responsibilities on each project.
- **References:** Contacts who can verify your leadership, reliability, work quality, and project performance.
- **Role strengths:** Superintendent, project manager, or both; include relevant software experience.
- **Desired compensation:** Your requested compensation and preferred arrangement.
- **Location and travel:** Home location and availability for local Florida work, statewide travel, and/or nationwide travel. Select all that apply.
- **Availability:** Earliest start date and current availability.
